

From Vera & Hennadii, at Lichfield food festival, May 2026:

“Success, for us, is doing something that truly brings joy.

This year, our family created a new project called Ukrainian Family Kitchen - a culinary journey inspired by our love for cooking and family traditions. We wanted to introduce British people to the rich and delicious flavours through the dishes our family loves most.

What makes this project so special is that we genuinely enjoy every single moment of it. For us, real success is not only about achievements — it is about waking up every day excited to do what you love, with passion and soul.

In just one month, we have already taken part in four festivals, received so many wonderful and heartwarming reviews from British visitors, and have been invited to ten more festivals throughout the summer. Every event brings incredible emotions, new friendships, meaningful conversations, and unforgettable experiences.

We travel to festivals together with our children, and they are a huge part of this journey. They help us, support us, and grow together with this family project. Seeing our shared dream become something bigger than we imagined fills me with happiness and gratitude.

For me, success means turning your ideas into reality and enjoying every minute of the process. Ukrainian Family Kitchen is not just food - it is love, family, culture, communication, and joy that we are proud to share with others.”

UKRAINIAN FAMILY KITCHEN
