

Leicester City of Sanctuary

Volunteer Role

PAT Tester

JOB TITLE	PAT Tester
JOB PURPOSE	Provide PAT Testing for our textiles group
REPORTING TO	Administration Officer
LOCATION	St. Martin's House, Leicester.

Overview

We run regular a Textiles and Sewing group for members of our community, and we want to make sure all our equipment (sewing machines, overlockers, and other electrical items) are safe and properly tested.

We're looking for a volunteer who can carry out Portable Appliance Testing (PAT) on our group's electrical equipment. The commitment is likely to be annually and we'll work around a time that suits you. You'd be required to undertake the testing at our venue and we would reimburse reasonable travel expenses, as with all volunteers.

What you'd be doing

- Testing electrical appliances used in our Textiles and Sewing groups (primarily domestic sewing machines and overlockers)
- Labelling tested items with pass/fail results
- Providing a basic record of tested items and outcomes for our files
- Advising us if any equipment needs repair or should be taken out of use
